

## Features

PRISMA LED's new innovative extrusion with heavy duty frosted PC cover lens. 160° view angle. Silver (anodised 6603 alloy) or painted white. It is purposely made to be used with LED strip and especially our commercial grade and can be cut to any suitable lengths. It is brilliant as it can accommodate "dual" options as RGB and white strip side by side or single colour to be used in office/home, just select the desired output. Using PRI-ELITE with a selection of our strips to instead of the old tired look T8 tubes to get great smart looking and powerful output lighting to suit your application. 3m suspension wire kit is available.
